	3,819,839
Total liabilities and shareholder's equity	\$ 10,833,980

See notes to Statement of Financial Condition

1. Organization and significant accounting policies

Basis of presentation

The Statement of Financial Condition includes the accounts of CIBC World Markets Corp., a registered broker-dealer (the "Company"). The Company is a subsidiary of CIBC Inc. ("Inc"). Inc is a subsidiary of Canadian Imperial Holdings Inc. ("CIHI"), which is a subsidiary of CIBC Bancorp USA Inc. ("Bancorp"). Bancorp is ultimately a wholly owned subsidiary of the Canadian Imperial Bank of Commerce ("CIBC" or the "Parent"), Toronto, Canada. The Company's operating results and financial condition could be significantly different from those that would have been obtained if the Company had been autonomous.

The accompanying Statement of Financial Condition of the Company as of April 30, 2026 has been prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP") and in accordance with Accounting Standards Codification ("ASC") as set forth by the Financial Accounting Standards Board ("FASB").

The following paragraphs describe our significant accounting policies, including the changes to our accounting policies effective since November 1, 2025.

Nature of business

The Company provides its clients and counterparties with a full range of services in connection with securities transactions, investment banking, and acting as a broker and dealer in securities.

Trading assets and Securities sold, not yet purchased

Trading assets and Securities sold, not yet purchased, are recorded at fair value on the Statement of Financial Condition. The fair values of trading positions are based on the amount at which the instrument could be exchanged in a current transaction between willing parties, that is, other than in a forced or liquidation sale.

Commissions

The Company executes trades in securities for customers on both an agency and principal basis. Agency transactions result in the recording of commission revenue, while principal trades result in the recording of trading revenue. Customers' securities transactions are recorded on a settlement date basis with related commission income and expenses recorded on a trade date basis. Company transactions in securities are recorded on a trade date basis.

The Company believes that the performance obligation is satisfied on the trade date because that is when the underlying financial instrument or purchaser is identified, the pricing is agreed upon and the risks and rewards of ownership have been transferred to/from the customer.

Investment banking and advisory

Investment banking and advisory revenues include gains, losses and fees arising from securities offerings in which the Company acts as an underwriter or agent. Investment banking and advisory revenues also include fees earned from providing merger and acquisition, financial restructuring and advisory services.

Underwriting revenue is recorded when the transaction closes. The Company believes that the date the transaction closes is the appropriate point in time to recognize revenue for securities underwriting transactions as there are no significant actions which the Company needs to take subsequent to this date and the issuer obtains the control and benefit of the capital markets offering at that point. Underwriting costs are recorded in other expenses when the related underwriting revenue is recognized.

Advisory revenue is generally recognized at the point in time that performance under the arrangement is completed (the closing date of the transaction) or the contract is cancelled. However, for certain contracts, revenue is recognized over time for advisory arrangements in which the performance obligations are simultaneously provided by the Company and consumed by the customer. In some circumstances, judgment is needed to determine the appropriate timing of revenue recognition under a specific contract. Retainers and other fees received from customers prior to recognizing revenue are reflected as contract liabilities.

Securities purchased under resale agreements and Securities sold under repurchase agreements

Securities purchased under resale agreements and securities sold under repurchase agreements are treated as collateralized financing transactions. The agreements provide that the transferor will receive substantially the same securities in return at the maturity of the agreement and the transferor will obtain from the transferee sufficient cash or other securities to purchase such securities during the term of the agreement. These agreements are recorded at the amounts at which they will be subsequently resold or repurchased plus accrued interest. As these transactions are short-term in nature, their carrying amounts are a reasonable estimate of fair value.

The Company's policy is to take possession of securities purchased under resale agreements, except under tri-party agreements where they are held by a third-party custodian. Securities purchased under resale agreements and securities sold under repurchase agreements with the same counterparty are reported on a net basis on the Statement of Financial Condition if the conditions of *ASC 210, Balance Sheet*, are met.

Securities borrowed and Securities loaned

Securities borrowed and securities loaned transactions are generally reported as collateralized financings. Securities borrowed transactions require the Company to deposit cash or other securities with the lender. With respect to securities loaned, the Company receives collateral in the form of cash or other securities in an amount generally in excess of the market value of the securities loaned. When the Company deposits or receives other securities, these transactions are included in Securities received as collateral or Obligation to return securities received as collateral respectively, on the Statement of Financial Condition.

The Company monitors the market value of securities borrowed and securities loaned on a daily basis, with additional collateral obtained or refunded as necessary. Securities borrowed and Securities loaned are recorded at contract value on the Statement of Financial Condition. Securities borrowed and securities loaned transactions are substantially short-term in nature, and accordingly, their carrying amounts are a reasonable estimate of fair value.

Included in Securities borrowed on the Statement of Financial Condition is \$3,581,180 of non-purpose securities borrowed which is not used to cover short positions, make delivery on fails, or enter into secured financing transactions.

Collateral

The Company accepts and pledges collateral in connection with secured financing and securities borrowing transactions. Agreements covering these transactions may permit the secured party to sell or repledge the collateral. The Company monitors the risk of loss by assessing the fair value of the collateral accepted or pledged as compared with the related receivable, payable or other collateral exchanged, and requests additional collateral where deemed appropriate. Substantially all transactions are collateralized by United States government securities, common stock, Canadian government and provincial, sovereign, and corporate bonds.

Collateral accepted from securities purchased under resale agreements, and securities borrowed transactions accepted under margin lending agreements is used to cover short positions, and to enter into secured financing transactions.

Furniture, fixtures, equipment, software, and leasehold improvements

Furniture, fixtures, equipment, software, and leasehold improvements are carried at cost, less accumulated depreciation and amortization and are included in Other assets on the Statement of Financial Condition. Depreciation of furniture and fixtures is provided on a straight-line basis over a period of 4 to 15 years. Depreciation of computer equipment is provided on a straight-line basis over a period of 3 to 7 years and software is provided on a straight-line basis over a period of 5 to 10 years. Amortization of leasehold improvements is provided on a straight-line basis over the lesser of the economic useful lives of the improvements or the terms of the leases.

Investment and Variable Interest Entity

US GAAP requires a variable interest entity ("VIE") to be consolidated by the party that has a controlling financial interest in the VIE (i.e., the primary beneficiary). The Company is deemed to have a controlling financial interest and is the primary beneficiary of a VIE if it has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and an obligation to absorb loss or the right to receive benefits that could potentially be significant to the VIE. A VIE is a partnership, limited liability company, trust, or other legal entity that does not have sufficient equity to permit it to finance its activities without additional subordinated financial support from other parties, or whose investors lack one of three characteristics associated with owning a controlling financial interest. Those characteristics are: (i) the power, through voting rights or similar rights, to direct the activities of an entity that most significantly impact the entity's economic performance, (ii) the obligation to absorb the expected losses of the entity; and (iii) the right to receive the expected residual returns of the entity.

Equity investment in an unconsolidated entity where the Company has the ability to exercise significant influence over the investee's operating and financing decisions is accounted for using the equity method of accounting. Refer to Note 6 for information regarding the Company's Investment.

Goodwill

Goodwill represents the excess of purchase price over the fair value of net assets acquired (including identifiable intangible assets) using the acquisition method of accounting.

Goodwill is allocated to reporting units at acquisition. Subsequent to initial recognition, goodwill is not amortized but, instead, is tested for impairment at the reporting unit level at least annually, or more often if an event occurs or circumstances change that would indicate it is more likely than not that the fair value of a reporting unit is less than its carrying amount. The Company performs an annual goodwill impairment assessment as of August 1 each year. In the event the Company concludes that all or a portion of goodwill is

impaired, a non-cash charge for the amount of such impairment would be recorded in earnings. Such a charge would have no impact on tangible or regulatory capital.

The goodwill impairment testing process is conducted by comparing the fair value of a reporting unit with its carrying amount. If the fair value of a reporting unit is less than its carrying amount, a goodwill impairment charge is recognized equal to the amount by which the carrying value exceeds fair value, limited to the total amount of goodwill allocated to that reporting unit. The Company has the option at the time of our annual goodwill impairment test to perform a qualitative assessment for each reporting unit to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value before applying the quantitative goodwill impairment test. If the Company concludes that this is the case, the Company would proceed with the quantitative test, as described above. Otherwise, the Company would be able to bypass the quantitative test and conclude that goodwill is not impaired from a qualitative perspective.

Use of estimates

The preparation of the Statement of Financial Condition in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, income, expenses, and related disclosures. Estimates and assumptions are primarily made to account for particular financial instruments, income taxes, asset impairment, and contingent liabilities. Actual results could differ from these estimates and assumptions.

Currency remeasurement

Monetary assets and liabilities denominated in foreign currencies are remeasured at exchange rates at the Statement of Financial Condition date.

Income taxes

The Company uses the asset and liability method to provide for deferred income taxes. The asset and liability method requires that deferred income taxes reflect the expected future tax effect of temporary differences between the carrying amounts of assets or liabilities and their tax bases. These temporary differences as well as unused tax losses and other tax attributes are tax-effected at rates expected to be in effect in the taxation year when the asset is realized or the liability is settled. A valuation allowance is established, if necessary, to reduce any deferred income tax asset to an amount that is more-likely-than-not to be realized.

Accounting for uncertainty in income taxes

ASC 740, *Income Taxes*, requires that an entity recognize in the Statement of Financial Condition the impact of a tax position, if that position is more-likely-than-not to be sustained on examination by the taxing authorities, based on the technical merits of the position. Tax benefits resulting from such a position are measured at an amount that has a greater than fifty percent likelihood on a cumulative basis to be sustained on examination. The Company accounts for interest and penalties as a component of income tax expense.

Share-Based compensation

The Company provides compensation to certain employees in the form of share-based awards.

Restricted stock award units ("RSA units"), deferred stock units ("DSUs") and performance share units ("PSUs") are required to be settled in cash, and are classified as liabilities with compensation expense and the related obligation adjusted to fair value based on changes in the share price of CIBC's common stock, through the settlement date. The fair value of PSUs is adjusted to reflect any market conditions of the awards and an estimate is made as to the number of shares expected to vest as a result of actual performance against the

performance criteria to determine the amount of compensation expense to be recognized. The estimate is re-evaluated quarterly and total compensation expense and the related obligation is adjusted for any change in the current period.

As compensation expense is recognized, a deferred tax asset is recorded that represents an estimate of the future tax deduction from exercise, cash settlement or release of restrictions. At the time share-based awards expire, are exercised or canceled, cash settled, or as restrictions are released, the Company may be required to recognize an adjustment to income tax expense, depending on the market price of CIBC's stock at that time and the amount of the deferred tax asset relating to such awards.

To mitigate income statement volatility due to changes in CIBC's common share price, CIBC has entered into an agreement (the "immunization agreement") with the Company whereby the change in fair value of share-based compensation awards from the grant date to settlement date is accounted for as a derivative and is marked to fair value on a monthly basis with changes in the value of the derivative recorded in other non-interest income. At settlement of the share-based compensation award, CIBC will transfer an amount of cash to the Company equal to the fair value of the derivative.

Post-employment benefits

Costs for these plans are recognized during the year in which the service is provided.

Fair value measurements

ASC 820, Fair Value Measurements, provides a single definition of fair value together with a framework for measurement, and requires additional disclosure about the use of fair value techniques to measure assets and liabilities. ASC 820 emphasizes that fair value is a market-based measurement, not an entity-specific measurement, and sets out a fair value hierarchy with the highest priority being quoted prices in active markets. Under ASC 820, fair value measurements are disclosed by level within that hierarchy. The Company has disclosed the fair value measurements by level within the hierarchy in Note 9.

Offsetting financial instruments

Financial assets and financial liabilities are offset, and the amount presented net, when the Company has a legally enforceable right to set off the recognized amounts and intends to settle on a net basis or to realize the asset and settle the liability simultaneously.

Revenue Recognition

ASC 606, Revenue from Contracts with Customers, establishes principles for reporting information about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts to provide goods or services to customers. The accounting requires the Company to follow a five-step process: (1) identify the contract(s) with a customer, (2) identify the performance obligations in the contract, (3) determine the transaction price, (4) allocate the transaction price to the performance obligations in the contract, and (5) recognize revenue when (or as) the entity satisfies a performance obligation. All arrangements involving the transfer of goods or services to customers are within the scope of the guidance, except for certain contracts subject to other U.S. GAAP guidance, including lease contracts and rights and obligations related to financial instruments. Revenue sources impacted by the guidance include investment banking and advisory, and commissions. Refer to Note 2 for additional information regarding revenue recognition.

Operating segment

An operating segment is a component of a business that (i) engages in business activities from which it may earn revenues and incur expenses; (ii) has operating results that are reviewed regularly by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance; and (iii) has discrete financial information available. The Company has one operating segment, Capital Markets, which is the sole reporting segment.

The accounting policies used to measure the profit and loss of the Capital Markets segment are the same as those described in the summary of significant accounting policies. The Company's chief operating decision makers ("CODM") are its Senior Executive Vice-President and Group Head, U.S. Region along with the MD & Head of US Capital Markets who maintain responsibility for the day-to-day management of the Company including regularly reviewing net income to evaluate the results of the Capital Markets segment. Additionally, the CODM uses excess net capital to make operational decisions while maintaining capital adequacy. The operating results of the Capital Markets segment are reported on the Statement of Financial Condition.

Measurement of Credit Losses on Financial Instruments

The allowance for credit losses on financial assets that are measured at amortized cost reflects management's estimate of credit losses over the remaining expected life of such assets. Expected credit losses for newly recognized financial assets, as well as changes to expected credit losses during the period, are recognized in earnings. The Company has elected to use a practical expedient whereby for certain financial assets, the expectation of nonpayment is zero if the borrower continually replenishes collateral securing the financial asset and the value of the collateral is equal to or exceeds the amortized cost basis of the financial asset (the "collateral maintenance method"). Financial assets to which the collateral maintenance method is applied include reverse repurchase agreements, securities borrowed, certain receivables from customers, and certain broker receivables. For these financial assets, an allowance is calculated on any undercollateralized amounts. For those financial assets measured at amortized cost that are not eligible for the collateral maintenance method, the Company estimates credit losses over the life of the financial assets as of the reporting date based on relevant information about past events, current conditions, and reasonable and supportable forecasts. Financial assets to which the collateral maintenance method is not applied include cash, certain customer receivables, certain broker receivables, and receivables from clearing organizations.

Accounting Pronouncements Pending Adoption

Disaggregation of Income Statement Expenses - In November 2024, the FASB issued guidance which requires public business entities to disclose additional information about specific expense categories including employee compensation, depreciation, intangible asset amortization, etc., as well as qualitative descriptions of certain expenses, in the notes to the financial statements. The guidance will be required for the Company beginning on November 1, 2027, with early adoption permitted. The guidance should be applied on either a prospective or retrospective basis. The effect of the new guidance on the Company's financial statements is still being determined.

Interim Reporting- Narrow-scope Improvements - In December 2025, the FASB issued guidance to clarify interim reporting requirements under GAAP by providing a comprehensive list of required interim disclosures and introducing a principle to disclose material events after the last annual period. The amendments also clarify the applicability of Topic 270, the types of interim reporting, and the form and content of an interim financial statements in accordance with GAAP. The update does not expand or reduce existing requirements but improves clarity and consistency. The guidance will be required for the Company beginning November 1, 2028. The effect of the new guidance on the Company's financial statements is still being determined.

Accounting Pronouncements Recently Adopted

Improvements to Income Tax Disclosures - In December 2023, the FASB issued guidance to improve the transparency of tax disclosures by requiring (1) consistent categories and greater disaggregation of information in the rate reconciliation and (2) income taxes paid disaggregated by jurisdiction, in addition to certain other amendments intended to improve the effectiveness of income tax disclosures. This guidance was adopted on November 1, 2025. The adoption of this guidance did not have a material effect on the Company's financial statements.

2. Revenue from contracts with customers

Revenue is recognized when obligations under the terms of the contract with the Company's customer are satisfied. Revenue is measured as the amount of consideration the Company expects to receive in exchange for providing services. The Company does not have any significant payment terms as payment is received at or shortly after the satisfaction of the performance obligation.

Investment banking and advisory

Investment banking include gains, losses and fees arising from securities offerings in which the Company acts as an underwriter or agent. Advisory fees includes fees earned from providing merger and acquisition, financial restructuring and advisory services. Fees are typically billed and received upon the close of the transaction or fulfilment of other advisory related obligation.

Commissions

Securities commission is comprised of fees received upon execution of trades in debt and equity securities on behalf of customers. Payment from customers is due upon settlement date for purchase and sale of securities, and revenue is recognized at the point in time the trade is executed.

The following table provides information about receivables from contracts with customers as of November 1, 2025 and April 30, 2026:

Total receivables from contracts with customers:	November 1, 2025	April 30, 2026
Investment banking receivable	\$ 31,631	\$ 21,782
Advisory fees receivable	4,728	3,375
Commissions receivable	4,431	4,164
Total	\$ 40,790	\$ 29,321

At April 30, 2026, the Company had no contract assets and the contract liabilities were immaterial. Receivables are recognized in the period the Company provides services when the Company's right to consideration is unconditional. Receivables from contracts with customers are included within Receivable from broker-dealers and clearing organizations in the Statement of Financial Condition

3. Cash

Cash represents funds deposited with financial institutions that can be withdrawn without restriction. All cash is on deposit with major banks or the Parent.

4. Receivable from broker-dealers and clearing organizations and Payable to broker-dealers and clearing organizations

The components of Receivable from broker-dealers and clearing organizations and Payable to broker-dealers and clearing organizations as of April 30, 2026 are as follows:

Receivable from broker-dealers and clearing organizations:	Total
Clearing organizations	\$ 284,697
Securities failed to deliver	82,804
Investment banking and advisory receivable	25,157
Interest and dividends	24,527
Broker dealers and other	4,515
Total	\$ 421,700

Payable to broker-dealers and clearing organizations:	Total
Net Trade Date Accrual	\$ 94,484
Securities failed to receive	80,295
Clearing organizations	26,794
Investment banking and advisory payable	23,038
Interest and dividends	12,504
Broker dealers and other	4,970
Total	\$ 242,085

Securities failed to deliver and securities failed to receive are substantially short-term in nature, and accordingly, their carrying amounts are a reasonable estimate of fair value.

5. Receivable from and payable to customers

Receivable from and payable to customers include amounts due or owed on cash transactions. Receivable from customers include margin loan transactions where the Company will typically make a loan to the customer to finance the customers purchase of securities. These transactions are conducted through margin accounts. In these transactions, the customer is required to post collateral in excess of the value of the loan and the collateral must meet marketability criteria. Collateral is valued daily and must be maintained over the life of the loan. Securities owned by customers are held as collateral for these receivables.

6. Investment

The table below presents our interest in a VIE that is not consolidated in the Statement of Financial Condition at April 30, 2026.

Investment	April 30, 2026			
	Carrying Amounts		Maximum Exposure to Loss	
Investment in Loop Capital	\$	24,200	\$	24,200
Total	\$	24,200	\$	24,200

We hold a 10.05% preferred equity investment in Loop Capital, LLC, a full-service investment bank, brokerage and advisory firm. The investment is accounted for using the equity method of accounting and is included within Investment on the Statement of Financial Condition. This investee meets the definition of a VIE, but we are not the primary beneficiary as we are a limited investor and do not have the power to direct its investment activities. Our maximum exposure to loss is equal to the carrying amount of our investment.

7. Goodwill

Goodwill	Total	
Goodwill balance at November 1, 2025	\$	28,107
Change in goodwill		-
Goodwill balance at April 30, 2026	\$	28,107

Goodwill is not amortized but, instead, is subject to impairment tests at least on an annual basis or more often if events or circumstances occur that would indicate it is more likely than not that the fair value of a reporting unit is below its carrying value. Our annual goodwill impairment test was performed as of August 1, 2025, consistent with the timing of CIBC's goodwill assessment, and it was determined no impairment existed as of that date nor is the Company aware of any events or circumstances that would indicate goodwill is impaired at April 30, 2026.

8. Secured financing transactions

At April 30, 2026, the fair value of collateral accepted under securities purchased under resale agreements and securities borrowed transactions was \$6,200,153 of which \$2,286,439 was sold or re-pledged.

In transactions where the Company acts as the net borrower in a securities exchange, the securities borrowed and pledged are treated as off-balance-sheet transactions. At April 30, 2026, the Company had pledged securities with a fair value of approximately \$233,900 against borrowed securities with a fair value of approximately \$196,351 under these arrangements.

The Company enters into collateralized resale and repurchase agreements and securities borrowing and lending transactions that may result in credit exposure in the event the counterparty to the transaction is unable to fulfill its contractual obligations.

The Company minimizes credit risk associated with these activities by assessing the counterparty's profile and financial strength and assigning a commensurate risk rating, through monitoring counterparty credit exposure and collateral values on a daily basis and requiring additional collateral to be deposited with or returned by the Company when deemed necessary. In addition, the Company manages credit risk by entering into netting agreements with counterparties. These netting agreements generally enable the Company to offset liabilities against available assets received in the ordinary course of business and/or in the event that the counterparty to the transaction is unable to fulfill its contractual obligation. The Company offsets these financial assets and financial liabilities on the Statement of Financial Condition only when it has an enforceable legal right to offset the respective recognized amounts and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

For securities sold under repurchase agreements and securities lending transactions accounted for as secured borrowings, U.S. GAAP requires the disclosure of the collateral pledged and the associated risks to which a transferor continues to be exposed after the transfer. This provides an understanding of the nature and risks of short-term collateralized financing obtained through these types of transactions.

Securities sold under repurchase agreements and securities lending transactions represent collateralized financing transactions used to earn net interest income, increase liquidity or facilitate trading activities. These transactions are collateralized principally by U.S. government securities, common stock, and corporate bonds and have terms ranging from overnight to a longer or unspecified period of time.

In the event of the Company's default or a decline in fair value of collateral pledged, the repurchase agreement or security lending transaction provides the counterparty with the right to liquidate the collateral held or request additional collateral.

The following tables provide the gross obligation relating to securities sold under repurchase agreements and securities loaned by the class of collateral pledged and by remaining contractual maturity as of April 30, 2026.

Securities sold under repurchase agreements and securities loaned – by class of collateral pledged.

Class of collateral pledged	Total
U.S. government securities	\$ 199,500
Securities sold under repurchase agreements	199,500
U.S. government securities	55,314
Corporate bonds	253,297
Common stock	369,249
Securities loaned	677,860
Total gross recognized liabilities	\$ 877,360

Securities sold under repurchase agreements and securities loaned – by remaining contractual maturity.

Remaining contractual maturity	On demand¹	Up to 30 days²	30 to 90 days	More than 90 days	Total
Securities sold under repurchase agreements	\$ –	\$ 199,500	\$ –	\$ –	\$ 199,500
Securities loaned	677,860	–	–	–	677,860
Total gross recognized liabilities	\$ 677,860	\$ 199,500	\$ –	\$ –	\$ 877,360

¹ Includes contracts with no contractual maturity that may contain termination arrangements subject to a notice period.

² Includes overnight transactions.

The following tables presents information regarding the offsetting of these financial assets and financial liabilities:

Financial Assets	Gross Amounts	Amounts Offset on the Statement of Financial Condition³	Net Amounts Presented on the Statement of Financial Condition	Amounts Not Offset on the Statement of Financial Condition⁴	Net Amount
Securities purchased under resale agreements	\$ 860,855	\$ (199,500)	\$ 661,355	\$ (661,299)	\$ 56
Securities borrowed	5,591,515	—	5,591,515	(5,492,763)	98,752

Financial Liabilities	Gross Amounts	Amounts Offset on the Statement of Financial Condition³	Net Amounts Presented on the Statement of Financial Condition	Amounts Not Offset on the Statement of Financial Condition⁴	Net Amount
Securities sold under repurchase agreements	\$ 199,500	\$ (199,500)	\$ —	\$ —	\$ —
Securities loaned	677,860	—	677,860	(677,318)	542

9. Fair value measurements

Financial instruments carried on the Statement of Financial Condition at fair value

ASC 820 establishes a framework for measuring fair value and expands disclosures about fair value measurements in the Statement of Financial Condition.

The various inputs that may be used to determine the value of the Company's investments are summarized in three levels. The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

- **Level 1** – Quoted prices in active markets for identical securities.
- **Level 2** – Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

³ Amounts relate to master netting agreements which have been determined by the Company to be legally enforceable in the event of default and where certain other criteria are met in accordance with applicable offsetting accounting guidance ASC 210-20-45.

⁴ Amounts relate to master netting agreements and collateral agreements which have been determined by the Company to be legally enforceable in the event of default and where certain other criteria are not met in accordance with applicable offsetting accounting guidance ASC 210-20-45.

- **Level 3** – Significant unobservable inputs (including the Company's own assumptions used to determine the fair value of investments).

The investment's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for investments measured at fair value:

Common stocks, exchange-traded options, corporate bonds, asset-backed securities, and U.S. government securities: Common stocks are valued at the closing price; exchange-traded options are valued at the last price from active market; corporate bonds and asset-backed securities are valued utilizing observable market inputs; and U.S. government securities are valued at the last price from active markets.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Company's investments at fair value as of April 30, 2026.

Assets at Fair Value as of April 30, 2026	Level 1		Level 2		Level 3		Amounts Eligible for Offset		Total
Common stocks	\$	49,645	\$	—	\$	—	\$	—	\$ 49,645
U.S. government securities		2,457,318		—		—		—	2,457,318
Corporate bonds		—		182,005		—		—	182,005
Asset-backed securities		—		249,724		—		—	249,724
Exchange-traded options		12,681		41,143		—		(24,111)	29,713
Total trading assets, at fair value	\$	2,519,644	\$	472,872	\$	—	\$	(24,111)	\$ 2,968,405

Liabilities at Fair Value as of April 30, 2026	Level 1	Level 2	Level 3	Amounts Eligible for Offset	Total
Common stocks	\$ 48,874	\$ —	\$ —	\$ —	\$ 48,874
U.S. government securities	1,143,555	—	—	—	1,143,555
Corporate bonds	—	67,101	—	—	67,101
Exchange-traded options	22,756	1,355	—	(24,111)	—
Total securities sold, not yet purchased, at fair value	\$ 1,215,185	\$ 68,456	\$ —	\$ (24,111)	\$ 1,259,530

Trading assets with a market value of \$306,855 have been segregated in a special reserve bank account for the exclusive benefit of customers and Proprietary Account of Broker-Dealers (PAB) pursuant to Rule 15c3-3.

Financial instruments not carried on the Statement of Financial Condition at fair value

Other financial instruments are recorded by the Company at contract amounts and include cash, securities purchased under resale agreements, securities sold under repurchase agreements, short-term notes payable, receivable from and payable to customers, receivable from and payable to broker-dealers and clearing organizations, securities borrowed and securities loaned, and due from and due to affiliates. All financial instruments carried at contract amounts either have short-term maturities (one year or less), or bear market interest rates and, accordingly, are carried at amounts approximating fair value.

The following table represents the carrying value, fair value, and fair value hierarchy category of certain financial instruments that are not recorded at fair value in the Company's Statement of Financial Condition. The following table excludes all non-financial assets and liabilities.

Financial assets	Carrying Value	Fair Value	Level 1	Level 2	Level 3
Cash	\$ 74,232	\$ 74,232	\$ 74,232	\$ –	\$ –
Securities purchased under resale agreements	661,355	661,355	–	661,355	–
Securities borrowed	5,591,515	5,591,515	–	5,591,515	–
Receivable from broker-dealers and clearing organizations	421,700	421,700	–	421,700	–
Receivable from customers	705,123	705,123	–	705,123	–
Due from affiliates – service fees	105,773	105,773	–	105,773	–

Financial liabilities	Carrying Value	Fair Value	Level 1	Level 2	Level 3
Short-term notes payable	\$ 4,033,956	\$ 4,033,956	\$ –	\$ 4,033,956	\$ –
Securities loaned	677,680	677,680	–	677,680	–
Payable to broker-dealers and clearing organizations	242,085	242,085	–	242,085	–
Payable to customers	236,895	236,895	–	236,895	–
Due to affiliates – income taxes	276,447	276,447	–	276,447	–
Due to affiliates – service fees	6,115	6,115	–	6,115	–

10. Securities sold, not yet purchased, at fair value

The Company may sell securities short. A short sale is a transaction whereby the Company sells securities it does not own in anticipation of a decline in the market price of the securities as part of a hedging strategy or to facilitate a transaction. The Company is obligated to repurchase the securities at their market price at the time of replacement. Short sales involve certain risks and special considerations. Possible losses from short sales differ from losses that could be incurred from the purchase of a security because losses from short sales are not limited, whereas losses from purchases cannot exceed the total amount invested.

11. Derivative financial instruments

In the normal course of business, the Company utilizes derivative financial instruments in connection with its trading activities. The Company's derivative activities and exposure to derivative contracts are impacted by the following primary underlying risks: interest rate, market and credit risks (which includes issuer and counterparty risk).

Notional amounts, which represent the sum of gross long and short derivatives contracts, provide an indication of the volume of the Company's derivative activity; however, they do not represent anticipated losses.

The notional or contractual amounts below do not represent the potential market risk to the Company. Generally, these instruments are economically hedged with offsetting positions or are utilized to reduce the Company's market risk.

Similarly, the notional or contractual amounts of these instruments do not represent the Company's exposure to credit risk. Credit risk arises from the failure of the counterparty to perform according to the terms of the contract.

Options

The Company enters into option transactions to facilitate client orders, hedge Company risk and for investment purposes. Option contracts purchased give the Company the right, but not the obligation, to buy or sell within a limited time, a financial instrument, commodity or currency at a contracted price that may also be settled in cash, based on differentials between specified indices or prices.

Options contracts purchased require the payment of premiums in exchange for the right to purchase or sell underlying instruments at various strike prices and maturities. When the Company purchases options, the premium paid by the Company is recorded as an asset and is subsequently adjusted to the fair value of the option purchased.

Options written obligate the Company to buy or sell within a limited time, a financial instrument, commodity or currency at a contracted price. Alternatively, the Company would provide a cash settlement to the holder in the amount of the difference between the strike price of the option and the current market value. Options written by the Company may expose the Company to the market risk of an unfavorable change in the financial instrument underlying the written option.

As a writer of options, the Company receives premiums in exchange for bearing the risk of unfavorable changes in the price of the underlying instruments. When the Company writes options, the premium received by the Company is recorded as a liability and is subsequently adjusted to the fair value of the option written.

If a written put option is exercised, the premium received reduces the cost basis of the security purchased by the Company.

The contractual or notional amounts of exchange-traded options as of April 30, 2026 are set forth below:

Exchange-traded options	Notional	Fair Value
Purchased	\$ 529,951	\$ 53,824
Written	\$ 651,249	\$ 24,111

Options contracts contain legally enforceable provisions that allow for netting or setting off receivables and payables with each counterparty. As such, exchange-traded options contracts are reflected at fair value on a net basis on the Statement of Financial Condition within Trading assets, at fair value. The following table

presents information about option assets and liabilities that are subject to such provisions and were netted on the Statement of Financial Condition.

Exchange-traded options	Gross Amounts	Amounts Eligible for Offset	Collateral	Net Amount
Purchased	\$ 53,824	\$ (24,111)	\$ —	\$ 29,713
Written	\$ 24,111	\$ (24,111)	\$ —	\$ —

Futures contracts

The Company is subject to interest rate and equity price risk in the normal course of pursuing its investment objectives. The Company may use futures contracts to hedge against changes in interest rates and equity prices. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date.

The purchase and sale of futures contracts requires margin deposits with a Futures Commission Merchant ("FCM"). Subsequent payments (variation margin) are made or received by the Company each day, depending on the daily fluctuations in the value of the contract. Futures contracts provide minimal counterparty risk to the Company since futures are exchange-traded, and the exchange's clearinghouse, as the counterparty to all exchange-traded futures, guarantees the futures against default.

The Commodity Exchange Act requires an FCM to segregate all customer transactions and assets from the FCM's proprietary activities. A customer's cash and other equity deposited with the FCM are considered commingled with all other customer funds subject to the FCM's segregation requirements. In the event of an FCM's insolvency, recovery may be limited to the Company's pro rata share of segregated customer funds available. It is possible that the recovery amount could be less than the total of cash and other equity deposited. The Company has not experienced any losses on these accounts and does not believe it is exposed to any significant credit risk with respect to cash and other equity deposited with the FCM. As of April 30, 2026, the Company had no customer futures contract transactions.

The contractual or notional amounts of exchange-traded futures contracts as of April 30, 2026 are set forth below:

Exchange-traded futures contracts	Notional
Commitments to purchase	\$ 13,100
Commitments to sell	\$ 876,666

12. Related party transactions

In the normal course of business, the Company engages in various transactions with CIBC and its affiliates. These transactions include, but are not limited to, securities purchased under resale agreements and securities sold under repurchase agreements, securities borrowed, securities loaned, trade execution and custodial services, and services related to investment banking and financial products activities.

As a member of the CIBC group of companies, the Company participates in two types of service fee arrangements including residual profit sharing service fees and infrastructure and projects service fees. Certain revenues and expenses for shared services and profits from global business activities are allocated among affiliates and the Company on an agreed-upon basis in accordance with CIBC policy.

The Company receives residual profit sharing payments in which it shares profits or losses based on a residual profit split methodology linked to capital at risk, support services and key revenue generating functions, such as new issues, marketing, sales, and trading services. The methodology and allocations used to share profits or losses between the CIBC group of companies is an estimate and is subject to review by multiple tax authorities covering several years. Estimates are evaluated for changes as new information is received by management around the most appropriate profit allocation that will be accepted by tax authorities. The residual profit split transfer pricing methodology ensures that revenue related to global capital markets is properly shared between the Company, CIBC and its affiliates.

The Company has a master demand promissory note with affiliates to fund daily operations, securities lending, and margin loans. At April 30, 2026, the Company utilized \$4,033,956 with Inc which is included in short-term notes payable in the Statement of Financial Condition. The interest rate on the master demand promissory note is based on overnight Secured Overnight Financing Rate (SOFR).

The Company has a master unsecured promissory note with an affiliate to fund deposit requirements to a special reserve bank account for the exclusive benefit of customers in accordance with Rule 15c3-3. At April 30, 2026, the Company has not utilized the note. The Company is not charged a fee for unutilized commitments.

The following amounts related to transactions with CIBC and affiliates are included in the accompanying Statement of Financial Condition:

Assets	Total
Cash	\$ 60,331
Securities borrowed	468,748
Receivable from broker-dealers and clearing organizations	39,444
Receivable from customers	208,720
Trading assets, at fair value	59,702
Due from affiliates – service fees	105,773
Other assets	231,532

Liabilities	Total
Short-term notes payable	\$ 4,033,956
Securities loaned	610,629
Payable to broker-dealers and clearing organizations	433
Payable to customers	2,868
Securities sold, not yet purchased, at fair value	22,506
Due to affiliates – income taxes	276,447
Due to affiliates – service fees	6,115

Payable to customers includes \$95 related to affiliates that do not meet the definition of customer under Rule 15c3-3.

13. Liabilities subordinated to claims of general creditors

The Company has one \$250,000 revolving subordinated loan which matures on July 31, 2027. The \$250,000 revolving subordinated loan facility represents a commitment by CIHI to fund the Company and was not utilized as of April 30, 2026 or during the year. The Company is not charged a fee for unutilized commitments.

The revolving subordinated loan has an automatic rollover provision which will extend both the credit period and the maturity date an additional year. The scheduled maturity date then in effect will not be extended if CIHI sends written notification to the Company, with a copy sent to FINRA, on or before the day seven months preceding the scheduled maturity.

The revolving liability is subordinated to all existing and future claims of all non-subordinated creditors of the Company. It has been approved as regulatory capital and would constitute part of the Company's net capital under the Securities and Exchange Commission's ("SEC") Uniform Net Capital Rule 15c3-1 (the "Uniform Net Capital Rule") and Commodity Futures Trading Commission ("CFTC") Regulation 1.17(d) and 1.17(h) if utilized by the Company.

14. Income taxes

The Company is part of Bancorp's consolidated group for purposes of filing its U.S. federal income tax return as well as for certain state and local combined unitary returns.

Bancorp arranges for the payment of U.S. federal, state, and local income taxes on behalf of the entire consolidated group. The Company reimburses or receives payment on a current basis from Bancorp based upon its standalone U.S. federal, state, and local tax liability.

Under ASC 740, temporary differences between carrying value and the tax basis of assets and liabilities are accounted for at enacted income tax rates. Under certain circumstances, estimates are used in determination of temporary differences.

As of April 30, 2026, the amount due to Bancorp that pertains to income taxes was \$276,447, recorded as Due to affiliates – income taxes in the Statement of Financial Condition. Included in that amount are net deferred tax assets of \$44,166, which the Company expects to be fully realized and, accordingly, no valuation allowance was established. The principal temporary differences that give rise to the Company's deferred tax assets are bonuses and deferred compensation.

The Company has evaluated the potential impact of ASC 740-10 and as of April 30, 2026, recorded unrecognized tax benefits of \$483, which is included in Due to affiliates – income taxes in the Statement of Financial Condition. The Company does not anticipate that the amount of unrecognized tax benefits will significantly increase or decrease within the next twelve months.

The statute of limitation for assessment or refund remains open for the tax years from 2011 to 2024 for Federal and 2010 to 2024 for New York State and New York City.

The Company accounts for interest and penalties on unrecognized tax benefits as a component of income tax expense. As of April 30, 2026, there is accrued interest and penalties of \$287 related to unrecognized tax benefits recorded in Due to affiliates – income taxes in the Statement of Financial Condition.

15. Other Commitments and contingencies

Other Commitments

From time to time, the Company enters into forward starting resale and repurchase agreements (agreements that have a trade date at or prior to April 30, 2026 and have a start date subsequent to April 30, 2026) usually collateralized by U.S. government securities or corporate bonds. These agreements are not recorded on the Company's Statement of Financial Condition until the start date of the transaction. As of April 30, 2026, the Company had no forward starting resale and repurchase agreements.

Litigation

The Company is a party to a number of legal proceedings in the ordinary course of its business. While there exists an inherent difficulty in predicting the outcome of such matters, based on current knowledge and consultation with legal counsel, the Company does not expect that the outcome of any of these matters, individually or in aggregate, would have a material adverse effect on the Company's financial position. However, the outcome of any such matters, individually or in aggregate, may be material to the Company's operating results for a particular year.

16. Employee benefit and other compensation plans

401(k) plan

The Company has a defined contribution retirement plan that covers substantially all our employees. Qualified employees are allowed to contribute up to 100% of their eligible compensation subject to Internal Revenue Service limits, through salary deductions on a pre-tax basis and/or after-tax basis under Section 401(k) of the Internal Revenue Code. Employee contributions are invested at their direction among a variety of investment alternatives, including CIBC common stock. Employee contributions are 100% matched by the Company, up to 6% of an employee's eligible compensation (subject to certain maximum compensation amounts as prescribed in Internal Revenue Service guidance). The Company's matching contributions vest over the period of three years.

Employee Stock Option Plan

The Company provides compensation to certain employees in the form of stock options of CIBC. Under the Employee Stock Option Plan ("ESOP"), stock options are periodically granted to selected employees. Options provide the employee with the right to purchase CIBC common shares from CIBC at a fixed price not less than the closing price of the shares on the trading day immediately preceding the grant date. In general, the options

vest by the end of the fourth year and expire 10 years from the grant date. The Company's expense for the ESOP was not significant.

RSA and PSU plans

Under the RSA and PSU plans, certain key employees are granted awards to receive the cash equivalent of CIBC common shares. RSA grants are made in the form of cash-settled awards which generally vest and settle at the end of three years or vest beginning two months from grant date up to four years from grant date and PSUs vest at the end of three years from the grant date. Dividend equivalents accrue in the form of additional units at the same rate as dividends on common shares and are paid out in cash at the same time the underlying units are settled.

The receivable from CIBC, in connection with the immunization agreement, is \$224,881 and included in Other assets on the Statement of Financial Condition. The obligation due to employees for RSAs and PSUs is \$163,818 and included in Accrued employee compensation and benefits. Both the receivable from CIBC and the amount due to employees fluctuate based on the changes in the price of CIBC common shares. The total intrinsic value paid to employees upon settlement of RSAs and PSUs was \$60,519 for the year ended April 30, 2026.

DSU plan

Under the DSU plan, certain employees can elect to receive DSUs in exchange for cash compensation that they would otherwise be entitled to and generally fully vest upon grant or can be awarded DSUs that vest in accordance with the vesting schedule defined in the grant agreement. DSUs settle in one lump sum cash payment on a date elected by the employee that is on or before Dec 31 of the following calendar year of their termination date. For US tax filers, the payment for DSUs is made on or after the business day following the six months in which their employment terminates. Participants receive dividend equivalents in the form of additional DSUs.

Grant date fair value of each cash-settled DSU is calculated based on the average CIBC closing price per common share on the Toronto Stock Exchange ("TSX") for 10 trading days prior to a date specified in the grant terms. These DSUs are settled in cash based on the average CIBC closing price per common share on the TSX for the 10 trading days prior to the payout date and after the employee's termination of employment.

The receivable from CIBC, in connection with the immunization agreement, is \$6,754 and included in Other assets on the Statement of Financial Condition. The obligation due to employees for DSUs is \$6,688 and included in Accrued employee compensation and benefits. Both the receivable from CIBC and the amount due to employees fluctuate based on the changes in the price of CIBC common shares.

17. Post-retirement benefits

Post-employment benefits

The Company has various defined benefit pension plans and post-employment benefit plans sponsored by CIBC that provide benefits to its employees. The employees are eligible to participate in the Company's qualified non-contributory U.S. defined benefit pension and defined contribution plans which include CIBC World Markets Retirement Plan for US Employees, the CIBC Unfunded Expatriate Retirement Income Plan and the CIBC Employment Contracts (collectively the "Pension Plan"). The Pension Plan and post-employment benefit plans are accounted for as a multi-employer plan. The Company also provides certain health-care, life insurance, and other benefits to eligible employees and retired members.

Consolidated disclosures about the Company's qualified non-contributory U.S. defined benefit pension plans, including their funded status, plan assumptions, investment strategy and asset allocation, fair value measurement of plan assets and liabilities, and other disclosures about the plans are included in the post-employment benefits note of CIBC's 2025 annual report.

18. Financial instruments with off-balance sheet risk and concentration of credit risk

In the normal course of business, the Company enters into securities transactions with various counterparties. If the securities subject to such transactions are not in the possession or control of the Company, the Company is subject to risk of loss if the security is not received, and the fair value has increased over the contract amount of the transactions.

The Company enters into various transactions in financial instruments with off-balance sheet risk in order to meet the needs of its clients and to manage its exposure to market risks. These transactions include the purchase and sale of futures, and the writing of exchange-traded options. Each of these transactions contains varying degrees of off-balance sheet risk.

Risks arise in financial futures, forward contracts and from unfavorable changes in currency exchange rates or in the market price of the underlying financial instruments. In written option contracts, the Company receives premiums at the outset and then bears the risk of unfavorable changes in fair values of the underlying instruments.

As an agent, the Company executes securities transactions on behalf of its customers. If either the customer or a counterparty fails to perform, the Company may be required to discharge the obligations of the nonperforming party. In such circumstances, the Company may incur a loss up to the amount by which the fair value of the security transaction exceeds the contractual value of the transaction.

The Company may deliver securities as collateral in support of various secured financing sources such as bank loans, securities loaned agreements and repurchase agreements. In such circumstances, the Company may incur a loss up to the amount by which the fair value of the securities delivered exceeds the fair value of the loan or other collateral received or in the possession or control of the Company. Additionally, the Company delivers customer securities as collateral to satisfy margin requirements of various exchanges. In the event the counterparty is unable to meet its contractual obligation to return customer securities delivered as collateral, the Company may be obligated to purchase the securities in order to return them to the customer.

The majority of the Company's transactions and its credit exposures are with customers, broker-dealers and other financial institutions in the United States. These activities primarily involve collateralized arrangements and may result in credit exposure in the event that the counterparty fails to meet its contractual obligations.

The Company's exposure to credit risk can be directly impacted by volatile securities markets, which may impair the ability of counterparties to satisfy their contractual obligations.

The Company seeks to control its credit risk through a variety of reporting and control procedures, including establishing credit limits based upon a review of the counterparties' financial conditions and credit ratings. In addition, the Company monitors collateral levels on a daily basis for compliance with regulatory and internal guidelines and requests changes in collateral levels as appropriate.

19. Net capital requirements

As a SEC registered broker-dealer and member firm of the Financial Industry Regulatory Authority ("FINRA"), the Company is subject to the Uniform Net Capital Rule. The Company has elected to use the alternative method, permitted by the Uniform Net Capital Rule, which requires that the Company maintains minimum net capital, as defined, equal to the greater of \$1,500 or 2% of aggregate debit items arising from customer transactions, as defined. FINRA may prohibit a member firm from expanding its business and declaring dividends if its net capital is less than 5% of aggregate debit items. As an introducing broker regulated by the National Futures Association, the Company is subject to the minimum net capital requirements adopted and administered by the CFTC and by certain commodity exchanges in the United States and in foreign locations. In the United States, the Company is required to maintain adjusted net capital (as defined by the CFTC) equivalent to or in excess of \$45 or the minimum amount required by the Uniform Net Capital Rule, whichever is greater.

As of April 30, 2026, the Company's net capital under the Uniform Net Capital Rule was \$2,189,313. The amount in excess of the greater of the minimum amount required by the Uniform Net Capital Rule or the CFTC minimum requirement was \$2,168,681 and the amount in excess of the greater of 5% of aggregate debit items or \$1,800 or the CFTC early warning level was \$2,137,734.

20. Subsequent events

The Company has evaluated whether any events or transactions occurred subsequent to the date of the Statement of Financial Condition and through June 18, 2026, the date the Statement of Financial Condition were issued, and has determined that no subsequent events have occurred that would require disclosure in the Statement of Financial Condition or accompanying notes.
